PROFESSIONAL SUMMARY

Software Engineer / Full-Stack Developer and Co-Founder of Laraleb, the largest Laravel community in Lebanon, and Lebify a small development Web Group. I have Hands on experience building, deploying, and maintaining production-ready web applications. Strong expertise in Laravel, Vue.js, JavaScript, RESTful APIs, and database design. Experienced in server management, production support, bug fixing, and application maintenance

EXPERIENCE

Full-Stack Developer

Pixel38 March 2025 - Present / Full-time

- & Delivered production-grade systems across multiple high-traffic projects using Laravel.
- & Led complex payment integrations (2 gateways: JCC & AREEBBA), enabling secure one-time and recurring transactions.
- & Built and maintained core integrations with enterprise services (Twilio, Postmark, AWS S3, Cloudflare R2, Calendly...).
- & Owned AWS infrastructure, deployments, production support, and GitHub workflows, ensuring system stability.
- & Sole Backend Developer on a large-scale B2B Project, responsible designing and implementing the backend architecture, APIs and database systems.

PROJECTS

Aboulira E-Commerce Platform | Full-Stack Developer

Laravel, Vue.js, Inertia.js | Client Project | link: <https://aboulira.com/en>

- & Built a fast, SEO-optimized e-commerce platform for 3 motorcycle shops with 1,500+ products.
- & Implemented delivery caching and discount features, improving checkout performance.

Task Management System (TMS) | Full-Stack Developer

Laravel 12, Tailwind CSS, Alpine JS | Admission Project

- & Built a comprehensive task management system with multi-role authentication and project collaboration features.

- & Implemented automated workflows with scheduled commands for task reminders and project archiving.
- & Developed queue-based systems with retry logic and exponential backoff.
- & Created RESTful API with dual web/API response handling and real-time AJAX updates.

TrueCare - Healthcare Platform | Full-Stack Developer

Laravel, Vue.js, Inertia.js | Personal Project

- & Built Laravel 12, Vue 3, and Inertia.js for appointment booking, medical records (diagnosis, symptoms, medications), and role-based access (patient/admin).
- & Implemented real-time patient-doctor messaging using Laravel Reverb and Laravel Echo for WebSocket-based chat within the app.
- & Designed an admin dashboard with stats, today's appointments, completion rates, Chart.js visualizations, and management of users, working hours, and contact messages.
- & Delivered full-stack features with Tailwind CSS, Radix Vue, Pinia, and TypeScript/Vite, including email verification, profile/settings, and database-backed queues.
